

E-Stock Web

STOCK CONTROL SOFTWARE FOR ALL TYPES OF COMPANIES OFFERED AS A SERVICE

Developed by PRNET Software

What is E-Stock Web?

E-Stock Web is a Web software, whose purpose is to help you manage the stock of your business products.

You may manage the inventory of al kind of products that you have in your bussiness. You can check the purchases in goods for your business and their internal and external movements.

E-Stock Web gives you minutely reports and searches and the option to export the data to many formats (such PDF and Excel).

You have as well as a complete report of the products that are under the minimum stock in order to deliver an order to your providers when you need.

The program has the following optional modules: Purchase Orders, Expenses.

Main functionalities

- ✓Alert board with detailed filters
  - ✓Products below the minimum stock
  - ✓Products below the safety stock
  - ✓Products to expire
- ✓Support of perishable products and products identified with Serial Number, Product Code and Bar Code
- ✓Full reports of Products in Stock
  - ✓Movement Tracking
  - ✓Traceability
  - ✓Stock valuation reports
- ✓Interactive chart of stock distribution
